

Custom Molded Products

- Do you have a product idea, but don't know where to start?**
- Do you have a custom color you are having troubles matching?**
- Do you have a large or unusually shaped product?**

If you answered yes to any of the questions above, we have the solution for you...

Rotomolding - where the possibilities are endless!

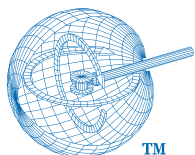

Utilize our group of experienced engineers in creating a custom product to fit your needs. Our full-service engineering group works with advanced Mechanical Desktop / AutoCAD software to design your product. From the initial concept, construction of the mold, through to shipping the product out the door, RTS will work with you in confidence on the project.

Rotational molding gives way to a variety of applications as you will see on the reverse side of this page. Call 1-800-663-2803 today to discuss your options.

Advantages:

- Products are virtually stress free
- Excellent for large or unusually shaped products
- Walls of uniform thickness from thin to double-wall construction are possible
- Textures, high gloss, colors and decorative details are easily obtained
- Molds are created with short lead times
